

# DIVIT<sup>®</sup>

**Take Your Exhibition  
to the Next Level!**

**Take your visitors  
on a journey  
in time and space!**

End to end  
immersive experience solution  
for museums, galleries  
and exhibitions.

 InnoTeq

Our **Extended Reality visualization solutions** make the discovery of digital collections, museum exhibitions, archive documents and maps a thrilling adventure. With the possibilities of Virtual Reality, Augmented Reality and GIS **we open new dimensions in content presentation.**

Take your exhibition to the next level with **spectacular interactive content** brought to the users by terminals, mobile applications, VR glasses or mixed reality installations.

**Expand your content universe with new ways to tell the story in 3D.**

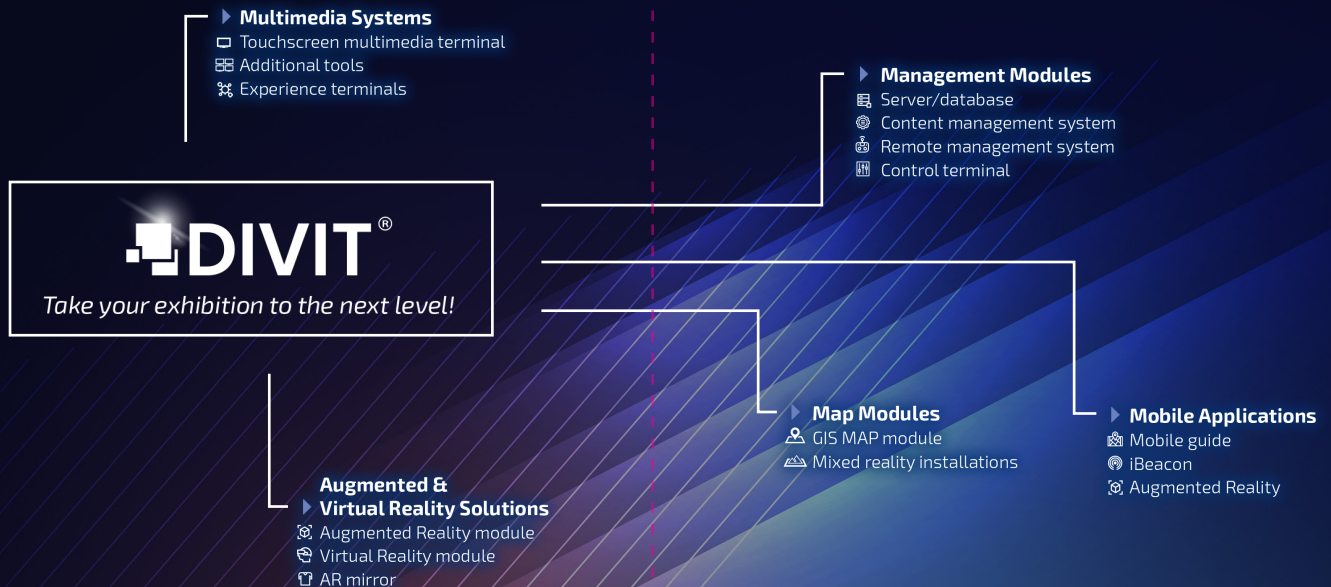

Create and immersive experience with AR and VR and add multimedia content (text, picture, map, video, audio) to any object to give your visitors more knowledge and excitement.

# THE EXCITEMENT OF DISCOVERY.

**DIVIT is a highly scalable and flexible system**, which gives you total control over the hardware and the content.

You can add new elements like touchscreens, projectors, iBeacon and many more to your exhibition with ease and upload or change new content related to the exhibition.

**You do not even need a local server, content can be stored and managed on a remote or a cloud server.**

**Immerse your visitor  
in a whole new world  
of content, let them become  
the part of the story!**

**Use DIVIT to exhibit,  
to educate, to guide, to entertain  
and to extend beyond reality!**
